

Microsoft India launches new women's safety app 'Guardian' for Windows phone users.

Microsoft India today said it is introducing Guardian, a new safety application (app), available exclusively for Windows phone users in India.

Incidents such as 'Nirbhaya' prompted the global IT giant to come out with an app aiming at protecting women, Microsoft IT India Managing Director Raj Biyani said.

Explaining its features, Biyani said Guardian enables users to switch on a 'track me' feature in the app that lets friends and family track them in real time using Microsoft Windows Azure cloud services and Bing Map APIs.
